A Python Primer for ArcGIS® Nathan Jennings

The automation of geoprocessing tasks is becoming a common practice among GIS professionals. Python is the standard programming language for ArcGIS and other fields such as remote sensing, GPS, spatial modeling, and statistical analysis. *A Python Primer for ArcGIS®* combines fundamental Python programming structures to help professionals automate common geoprocessing functions. Thorough explanations of programming concepts are included along with user-friendly demonstrations that enable readers to develop programs on their own. In addition, chapters contain exercises and questions that aid in the application of each chapter's highlighted principles. This book provides a practical approach to a broad range of programming skills using ArcGIS for geoprocessing and map production in the work place.
