Business Component Factory: A Comprehensive Overview of Component-Based Development for the Enterprise (OMG) Peter Herzum, Oliver Sims
In this book, Peter Herzum and Oliver Sims present a complete component based strategy, the business component approach, that applies and extends component thinking to all aspects of the software life cycle for enterprise systems. The approach includes a conceptual framework that brings components into the world of scalable systems, and outlines the different component granularities.

It also includes a methodology that goes beyond current object-oriented practices to provide the concepts required to meet the real challenges of component-based development. Using their business component approach, the authors then provide a blueprint for a business component factory--a development capability that can produce software with the quality, speed, and flexibility needed to match changing business needs. Sprinkled with guidelines, tips, and architectural patterns, this book fully prepares you for the approaching component revolution.

Praise for Business Component Factory

". . . this book should be very useful for anyone considering the daunting task of adopting component software on an enterprise scale."-Clemens Szyperski (Microsoft Research), Author of the award-winning book, Component Software: Beyond Object-Oriented Programming

"Herzum and Sims do an admirable job of differentiating the different component concepts, allowing this clearly written book to focus on the construction of business systems by non-software practitioners, out of business component parts developed separately (and perhaps for a commodity component marketplace). This is the future of software systems, and this book is a practical, giant step in that direction."-Richard Mark Soley, PhD,Chairman and CEO, OMG

"Finally, a book that takes you from component design all the way down to the middleware on which they are deployed. ItÕs an important contribution to the nascent server-side component discipline written by practitioners for practitioners."-Robert Orfali, Author of Client/Server Survival Guide, Third Edition and Client/Server Programming with Java and CORBA, Second Edition (both from Wiley)

From reader reviews:

Betty Castaneda:

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or their particular friends. Usually they doing activity like watching television, planning to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Could possibly be reading a book is usually option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the guide untitled Business Component Factory: A Comprehensive Overview of Component-Based Development for the Enterprise (OMG) can be excellent book to read. May be it could be best activity to you.

Linda Yohe:

Reading a book for being new life style in this calendar year; every people loves to study a book. When you read a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, as well as soon. The Business Component Factory: A Comprehensive Overview of Component-Based Development for the Enterprise (OMG) provide you with a new experience in reading through a book.

Connie Deroche:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just small students that has reading's internal or real their passion. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Business Component Factory: A Comprehensive Overview of Component-Based Development for the Enterprise (OMG) can make you really feel more interested to read.

Chris Robins:

What is your hobby? Have you heard that question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as studying become their hobby. You have to know that reading is very important in addition to book as to be the point. Book is important thing to add you knowledge, except your current teacher or lecturer. You find good news or update with regards to something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is Business Component
