Engraving on Precious Metals A. Brittain, P. Morton

Engraving on Precious Metals is for professionals and others who wish to learn hand engraving as a hobby or trade, and reveals many previously undisclosed practices of the commercial engraver which help to make his skill quite astonishing. All aspects of the craft are covered exhaustively, including the relatively modern innovation of the high-class machine engraver. Illustrated throughout with over 250 drawings, the book gives practical hints for use in the workshop, while artistic matters are covered extensively in chapters on lettering design and layout, monograms, nameplates and ornamentation. A basic knowledge of ancillary crafts can be found in the sections on piercing, polishing, soldering and inlaying, and the use of unusual materials such as ivory, wood, or plastic is also discussed.
