Psychology for Medicine

Susan Ayers, Richard de Visser

Psychology for Medicine Susan Ayers, Richard de Visser

"As the fundamental importance of psychological aspects of medical practice becomes ever more evident, and a correspondingly greater knowledge of psychology is required of medical graduates, books like this one must become essential reading for all medical students."

- Michael Sharpe MD, FRCP FRCPsych, Professor of Psychological Medicine, University of Edinburgh

"It's a great textbook, the application to Medicine is nicely outlined and the case studies illustrating the points further are brilliant. It's easy to read and follow and really highlights the importance of Psychology in Medicine. I will definitely be recommending this text to my students!"

- Dr Harbinder Sandhu, Health Psychology Institute of Clinical Education, University of Warwick

This first-of-its-kind, comprehensive textbook covers all the psychology an undergraduate medical student needs to know. The authors show the importance of applied psychological theory and evidence to medicine, and offer enough depth on the subject to span an entire degree.

Split into four sections, the book is a unique mix of psychological theory and evidence with implications for clinical practice, clinical tips and case studies.

- **Psychology and Health:** covers core topics such as stress, symptom perception, health behaviour and chronic illness.
- **Basic Foundations of Psychology:** explores areas of biological, developmental, cognitive and social psychology relevant to medicine.
- **Body Systems:** psychological research specific to body systems, including cardiovascular, respiratory, gastro-intestinal, immunology and reproduction.
- **Health-Care Practice** covers clinical skills and practice, including chapters on evidence-based medicine, communication skills and psychological intervention.

With a full colour text design, each chapter follows the same accessible format which includes summaries, learning objectives, case studies, research examples, applications to clinical practice, further reading and short answer questions. They include the latest psychological theory and research evidence.

Avis Marguez:

People live in this new morning of lifestyle always make an effort to and must have the spare time or they will get lot of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely yes. People is human not only a robot. Then we request again, what kind of activity do you have when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading publications. It can be your alternative inside spending your spare time, the book you have read is Psychology for Medicine.

Samuel Crader:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the educator want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Psychology for Medicine can make you truly feel more interested to read.
