Data Management and Query Processing in Semantic Web Databases

Sven Groppe

Data Management and Query Processing in Semantic Web Databases Sven Groppe

The Semantic Web, which is intended to establish a machine-understandable Web, is currently changing from being an emerging trend to a technology used in complex real-world applications. A number of standards and techniques have been developed by the World Wide Web Consortium (W3C), e.g., the Resource Description Framework (RDF), which provides a general method for conceptual descriptions for Web resources, and SPARQL, an RDF querying language. Recent examples of large RDF data with billions of facts include the UniProt comprehensive catalog of protein sequence, function and annotation data, the RDF data extracted from Wikipedia, and Princeton University's WordNet. Clearly, querying performance has become a key issue for Semantic Web applications.

In his book, Groppe details various aspects of high-performance Semantic Web data management and query processing. His presentation fills the gap between Semantic Web and database books, which either fail to take into account the performance issues of large-scale data management or fail to exploit the special properties of Semantic Web data models and queries. After a general introduction to the relevant Semantic Web standards, he presents specialized indexing and sorting algorithms, adapted approaches for logical and physical query optimization, optimization possibilities when using the parallel database technologies of today's multicore processors, and visual and embedded query languages.

Groppe primarily targets researchers, students, and developers of large-scale Semantic Web applications. On the complementary book webpage readers will find additional material, such as an online demonstration of a query engine, and exercises, and their solutions, that challenge their comprehension of the topics presented.

From reader reviews:

Sharon Hall:

The book Data Management and Query Processing in Semantic Web Databases gives you the sense of being enjoy for your spare time. You should use to make your capable more increase. Book can to become your best friend when you getting pressure or having big problem using your subject. If you can make looking at a book Data Management and Query Processing in Semantic Web Databases being your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about many or all subjects. You may know everything if you like start and read a guide Data Management and Query Processing in Semantic Web Databases. Kinds of book are a lot of. It means that, science publication or encyclopedia or some others. So , how do you think about this book?

Helen Massey:

Many people spending their time period by playing outside together with friends, fun activity with family or just watching TV all day every day. You can have new activity to invest your whole day by reading a book. Ugh, you think reading a book can definitely hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Mobile phone. Like Data Management and Query Processing in Semantic Web Databases which is keeping the e-book version. So , why not try out this book? Let's notice.

John Cheung:

This Data Management and Query Processing in Semantic Web Databases is brand-new way for you who has interest to look for some information mainly because it relief your hunger details. Getting deeper you onto it getting knowledge more you know or perhaps you who still having bit of digest in reading this Data Management and Query Processing in Semantic Web Databases can be the light food for you because the information inside this book is easy to get simply by anyone. These books acquire itself in the form that is certainly reachable by anyone, yep I mean in the e-book type. People who think that in guide form make them feel tired even dizzy this publication is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for you. So , don't miss this! Just read this e-book variety for your better life and knowledge.

Richard Jimenez:

Do you like reading a book? Confuse to looking for your best book? Or your book seemed to be rare? Why so many question for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but in addition novel and Data Management and Query Processing in Semantic Web Databases or perhaps others sources were given knowledge for you. After you know how the truly amazing a book, you feel need to read more and more. Science reserve was created for teacher or maybe students especially. Those books are helping them to increase their knowledge. In some

other case, beside science e-book, any other book likes Data Management and Query Processing in Semantic Web Databases to make your spare time far more colorful. Many types of book like here.
