A Strategy Guide for Water Utility Managers and Executives, and a Compendium of Best Financial Practices for Utility Financial Leaders, a "How-To" Guide for Rate and Finance Technicians and a Reference Point for Policymakers

Detailing utility financial plans and rate structures, and highlighting how they align with community sustainability goals and utility objectives, is the focus of the fourth edition of **Water and Wastewater Finance and Pricing: The Changing Landscape**. Working from a historical perspective, this revised and updated text addresses the current pricing and financial management challenges involved in the water and wastewater industry. It builds on the concepts used in the standard manuals of the American Water Works Association and the Water Environment Federation, and offers additional insight into the long-term sustainability of water systems.

Provides Practical Applications of Finance and Pricing Approaches

This comprehensive guide to financial and pricing practices delves into a number of factors that have impacted how utility finances its capital program and how it structures rates to recover revenue requirements. Among numerous management challenges, the book addresses such issues as reduced per capita usage and customer demand, a weak economy, social media, balancing community environmental sustainability with financial sufficiency, an increased focus on water demand management and efficiency, and the concern over rate affordability. The author factors in the rate-setting process, implementing a cost-of-service and rate model as key input in each chapter, and also presents a strong financial and rate plan for achieving long-term sustainability.

What's New in the Fourth Edition:

- Presents cutting-edge management approaches and initiatives, and the importance of strong financial management in addressing strategic financial and pricing goals
- Expands the discussion on traditional financing options, factoring in the current economic climate
- Explores in detail how to integrate risk considerations into the development of effective financial and rate plans.
