## Russia 2025: Scenarios for the Russian Future

In early 2010 Russia once again entered a turbulent period. From the system of property distribution, to structure of the political elites and relations between the Center and the regions – various spheres of Russian life are in a state of flux. Two major factors are driving this change: oil prices which are unlikely to grow the way they did in the 2000s and the rapidly deteriorating efficiency of governance. Relations between federal and regional elites, as well as public activism, are derived from these two factors and play an important role of their own. Will change take an evolutionary path or is Russia facing another revolution? The book offers a view of the Russian future until 2025 based on thematic scenarios created by an international team of Russia scholars whose expertise range from politics and economics to demographics and foreign policy.
