Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) Chee Kai Chua, Murukeshan Vadakke Matham, Young-Jin Kim

Additive Manufacturing (AM), popularly known as 3D printing, is playing an increasingly significant role in the manufacturing arena. AM has revolutionized how prototypes are to be made and small batch manufacturing should be carried out. Due to high flexibility and high efficiency of lasers, laser-assisted Manufacturing (LAM) and AM technologies are recently getting much attention over traditional methods. This textbook is a timely information resource for undergraduates, postgraduates and researchers who are interested in this emerging technology. The book will cover the basics of lasers, optics and materials used for manufacturing and 3D printing. It will also include several case studies for readers to apply their understanding of the topics, provide sufficient theoretical background and insights to today's key laser-assisted AM processes and conclude with the future prospects of this exciting technology. This is the first textbook tailored specifically for Lasers in 3D Printing and Manufacturing with detailed explanations. The book will focus on laser-assisted 3D printing and Additive Manufacturing (AM) from basic principles of lasers, optics and AM materials to advanced AM technologies, including in-depth discussion on critical aspects throughout the laser-assisted AM processes, such as optical system design, laser-material interaction and laser parameters' optimization.

From reader reviews:

Louise Hawkins:

Here thing why this specific Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) are different and trusted to be yours. First of all reading a book is good but it depends in the content from it which is the content is as tasty as food or not. Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) giving you information deeper including different ways, you can find any e-book out there but there is no e-book that similar with Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing). It gives you thrill studying journey, its open up your own eyes about the thing which happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in park, café, or even in your approach home by train. In case you are having difficulties in bringing the printed book maybe the form of Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) in e-book can be your option.

Elizabeth Webster:

You may get this Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) by look at the bookstore or Mall. Merely viewing or reviewing it may to be your solve problem if you get difficulties for your knowledge. Kinds of this book are various. Not only by written or printed but in addition can you enjoy this book by simply e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose proper ways for you.

Jennifer Randolph:

That guide can make you to feel relax. This book Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) was bright colored and of course has pictures on there. As we know that book Lasers in 3D Printing and Manufacturing (Wspc Book Series in 3D Printing) has many kinds or genre. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for you and try to like reading that will.

Alvin Reed:

What is your hobby? Have you heard this question when you got pupils? We believe that that concern was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person just like reading or as examining become their hobby. You have to know that reading is very important and book as to be the matter. Book is important thing to increase you knowledge, except your current teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you choose to adopt be your object. One of them is actually Lasers in 3D Printing and

Manufacturing (Wspc Book Series in 3D Printing).
