Medicinal Chemistry of Bioactive Natural Products

Medicinal Chemistry of Bioactive Natural Products

Current discoveries and research into bioactive natural products

Medicinal Chemistry of Bioactive Natural Products provides a much-needed survey of bioactive natural products and their applications in medicinal chemistry. This comprehensive reference features articles by some of the world's leading scientists in the field on discovery, structure elucidation, and elegant synthetic strategies--developed for natural products--with an emphasis on the structure activity relationship of bioactive natural products. The topics have been carefully chosen on the basis of relevance to current research and to importance as clinically useful agents.

Rather than attempting to be a comprehensive encyclopedia of bioactive natural products, Medicinal Chemistry of Bioactive Natural Products guides the reader to the key developments in the field. By providing not only practical detail but a historical perspective on the chemistry and biology of the compounds under consideration, the book serves as a handy resource for researchers in their own work developing pharmaceuticals, and as an inspiring introduction for young scientists to the dynamic field of bioactive natural products research.

Enhanced by examples with updated research results, the discussion covers such topics as:

- * The chemistry and biology of epothilones
- * Vancomycin and other glycopeptide antibiotic derivatives
- * Antitumor and other related activities of Taxol and its analogs
- * The antimalarial properties of the traditional Chinese medicine, Quinghaosu (artemisinin)
- * Huperzine A: A natural drug for the treatment of Alzheimer's disease
- * The medicinal chemistry of ginkgolides from Ginkgo biloba
- * Recent progress in Calophyllum coumarins as potent anti-HIV agents
- * Plant-derived anti-HIV agents and analogs
- * Chemical synthesis of annonaceous acetogenins and their structurally modified mimics

From reader reviews:

Frank Lach:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each guide has different aim or maybe goal; it means that book has different type. Some people experience enjoy to spend their the perfect time to read a book. They can be reading whatever they consider because their hobby is reading a book. How about the person who don't like reading through a book? Sometime, individual feel need book whenever they found difficult problem as well as exercise. Well, probably you will need this Medicinal Chemistry of Bioactive Natural Products.

Amanda Doss:

What do you about book? It is not important along? Or just adding material when you require something to explain what the ones you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every individual has many questions above. The doctor has to answer that question mainly because just their can do this. It said that about publication. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this Medicinal Chemistry of Bioactive Natural Products to read.

Michael Wheeler:

Medicinal Chemistry of Bioactive Natural Products can be one of your basic books that are good idea. We recommend that straight away because this e-book has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but nonetheless delivering the information. The writer giving his/her effort to get every word into satisfaction arrangement in writing Medicinal Chemistry of Bioactive Natural Products although doesn't forget the main point, giving the reader the hottest and based confirm resource data that maybe you can be considered one of it. This great information could drawn you into brand-new stage of crucial considering.

James Longo:

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's heart or real their pastime. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading seriously. Any students feel that looking at is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Medicinal Chemistry of Bioactive Natural Products can make you feel more interested to read.
