Stochastic Modeling in Economics and Finance (Applied Optimization)

Jitka Dupacova, J. Hurt, J. Stepan

Stochastic Modeling in Economics and Finance (Applied Optimization) Jitka Dupacova, J. Hurt, J. Stepan

In Part I, the fundamentals of financial thinking and elementary mathematical methods of finance are presented. The method of presentation is simple enough to bridge the elements of financial arithmetic and complex models of financial math developed in the later parts. It covers characteristics of cash flows, yield curves, and valuation of securities.

Part II is devoted to the allocation of funds and risk management: classics (Markowitz theory of portfolio), capital asset pricing model, arbitrage pricing theory, asset & liability management, value at risk. The method explanation takes into account the computational aspects.

Part III explains modeling aspects of multistage stochastic programming on a relatively accessible level. It includes a survey of existing software, links to parametric, multiobjective and dynamic programming, and to probability and statistics. It focuses on scenario-based problems with the problems of scenario generation and output analysis discussed in detail and illustrated within a case study.

From reader reviews:

Jesus Puga:

What do you with regards to book? It is not important with you? Or just adding material when you really need something to explain what yours problem? How about your spare time? Or are you busy individual? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every individual has many questions above. They have to answer that question mainly because just their can do that. It said that about book. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need that Stochastic Modeling in Economics and Finance (Applied Optimization) to read.

Stacey Samuels:

Now a day individuals who Living in the era just where everything reachable by interact with the internet and the resources inside can be true or not involve people to be aware of each details they get. How individuals to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Examining a book can help individuals out of this uncertainty Information particularly this Stochastic Modeling in Economics and Finance (Applied Optimization) book since this book offers you rich data and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it you probably know this.

Rhonda Hoffman:

People live in this new day of lifestyle always attempt to and must have the spare time or they will get lots of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely of course. People is human not only a robot. Then we ask again, what kind of activity do you possess when the spare time coming to a person of course your answer will certainly unlimited right. Then ever try this one, reading publications. It can be your alternative inside spending your spare time, typically the book you have read is Stochastic Modeling in Economics and Finance (Applied Optimization).

Gregory Polster:

You are able to spend your free time to read this book this guide. This Stochastic Modeling in Economics and Finance (Applied Optimization) is simple to develop you can read it in the recreation area, in the beach, train as well as soon. If you did not have much space to bring the particular printed book, you can buy the particular e-book. It is make you easier to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
