The Big Book of Bugs Yuval Zommer

A beautifully illustrated, informative book for children introducing them to bugs that creep, crawl, bite, fly, and more

From moths and beetles to worms and spiders, the world is crawling with fascinating bugs. *The Big Book of Bugs* is the first fact-filled book for children to explore the vast array of creepy-crawlies that share our Earth.

In the first pages, children learn that bugs live nearly everywhere on the planet and gain tips on how to become a young bug spotter. As the book continues, the scenic compositions on each page are dedicated to key groups of bugs, including beetles, moths, butterflies, bees, snails, crickets, grasshoppers, worms, and spiders. Some spreads approach the world of bugs thematically, such as bugs that come out at night, baby bugs, and life cycles, how bugs hide and show off, and how some bugs love to live in your home. The conversational, funny text is also full of facts that will astonish children and adults, and accompanied by Yuval Zommer's colorful illustrations. Illustrated in color throughout
