## Guide for Participants in Peace, Stability, And Relief Operations

Peace, stability, and humanitarian operations typically involve the interaction of international organizations (IOs), nongovernmental organizations (NGOs), the U.S. government, and the U.S. military. The Institute's highly successful Guide to IGOs, NGOs and the Military in Peace and Relief Operations, which was based on peace operations in the Balkans following the Cold War, has been instrumental in facilitating interaction between IOs, NGOs, and the military. The revised Guide for Participants in Peace, Stability, and Relief Operations is updated to reflect lessons learned from operations that have occurred since 2000, particularly in Iraq, Afghanistan, and areas affected by the 2004 Asian tsunami. This invaluable guide provides short scenarios of typical international involvement in peace missions, natural disasters, and stability operations, as well as an introduction to the organizations that will be present when the international community responds to a crisis. Equally valuable are descriptions of the roles of the United Nations and other international institutions, NGOs, the U.S. military, and U.S. government civilian agencies, which were added because of their increased role in these operations. Although the guide is particularly useful for those serving in the field because it is designed to fit easily into a pocket or backpack and has a durable cover, it will also help headquarters personnel to understand the structure and roles of other organizations. A unique educational resource, the guide will be useful for many who are not in the field, including military and agency trainees and university students.
