## Meeting the Challenge of Social Problems via Agent-Based Simulation: Post-Proceedings of the Second International Workshop on Agent-Based Approaches in Economic and Social Complex Systems

The series of international workshops on Agent-Based Approaches in Economic and Social Complex Systems (AESCS) is part of the worldwide activities on computational social and organizational sciences.

The

second workshop, AESCS '02, focusing on progress of agent-based simulation was held in Tokyo in August 2002. AESCS '02 explored the frontiers of the field. The importance of cumulative progress was emphasized in discussions of

common tasks, standard computational models, replication and validation issues, and evaluation and verification criteria. Promoting multidisciplinary work in computational economics, organizational science, social dynamics,

and complex systems, AESCS '02 brought together researchers from diverse fields. This book contains the invited papers by Robert Axtell, Shu-Heng Chen, and Takao Terano, along with selected papers collected in three major

sections: Economic Systems, Marketing and Management, and Social Systems and Methodology.
