Meteor: Criando aplicações web real-time com JavaScript (Portuguese Edition) Caio Ribeiro Pereira
O JavaScript já é uma opção real de desenvolvimento server-side. Trabalhar com a mesma linguagem que utilizamos no front-end é também uma grande vantagem. Diversos frameworks surgiram e, sem dúvida, o Meteor é que mais se destaca.

Neste livro, venha desenvolver sua própria rede social do zero implementando funcionalidades que interagem em tempo real, além de também aprender a trabalhar com diversos componentes nativos do framework que visam agilizar a prototipagem da aplicação, utilizando o Meteor 1.1.x.

Também veremos como lidar tarefas do dia a dia como criação de templates com Handlebars; integração com a API do Facebook para autenticação e cadastro de usuários; utilização do banco de dados não-relacional MongoDB; e programação orientada a eventos, utilizando PubSub nativo do Meteor.
